

South Dakota is a rural state, and the number of quality radio stations are limited to just the most populated areas. XM radio offers the flexibility of music and news which I like. I pay my monthly subscription and feel that the Nat'l Assoc of Broadcasters has no right to say what I can and can not listen to. I respectfully urge the FCC to reject the NAB's petition 04-160 which will hamper the programming satellite radio offers.

Thank-you
